PRAJWAL S

Software Engineer — AI & Machine Learning

Bangalore, India — +91 8951150117 — sprajwal0208@gmail.com — linkedin.com/in/prajwal-s-5288b5224/

PROFILE

Software Engineer with 2+ years of experience building and deploying production-grade computer vision systems and data analytics platforms. Experienced in object detection, instance segmentation, deep learning, data visualization, model deployment, and performance optimization.

PROFESSIONAL EXPERIENCE

Software Engineer – Compviz Technologies *Apr 2024 – Present*

AIMS – Asset Inspection Management System

- Integrated CNN-based computer vision models including **YOLO26** and **Detectron2** for automated asset detection and classification, reducing manual inspection effort.
- Optimized annotation and report-generation pipelines, improving overall processing speed by **30%**.
- Deployed deep learning models into production workflows, reducing project turnaround time by **15%**.
- Integrated trained models with **CVAT** for automated dataset annotation, reducing labeling workload by **25%**.
- Collaborated with engineering and operations teams to fine-tune models for accuracy, robustness, and scalable real-world deployment.

KFEANS – Data Analytics & Visualization

- Designed and deployed interactive dashboards using **Apache Superset**, enabling stakeholders to extract **35% more actionable insights**.

TECHNICAL PROJECTS

Skin Disease Classification Using Deep Learning

- Developed a multi-class deep learning architecture for medical image classification, improving prediction accuracy by **15%** through architecture tuning and hyperparameter optimization.
- Research accepted at **Springer HINT'24**.

AI Techniques for Wildlife Poaching Detection

- Built a real-time **YOLOv8** computer vision system for detecting illegal poaching activities from live video streams.
- Developed a web-based alerting system integrating AI inference with automated notifications for faster field-level intervention.

EDUCATION

B.E. in Artificial Intelligence and Data Science *2020 – 2024*

Global Academy of Technology, Bangalore **CGPA: 7.73**

TECHNICAL SKILLS

Programming: Python, SQL, C

Machine Learning: Deep Learning, CNNs, Transformers, Generative AI, Model Training & Evaluation, Explainable AI (xAI), Natural Language Processing, TensorFlow, PyTorch

Computer Vision: Object Detection, Instance Segmentation, YOLO26, Detectron2

Data & Visualization: Apache Superset, Tableau, Power BI

Tools: CVAT, Git, Data Annotation Pipelines, Gitlab, MLFlow, Docker

Concepts: Model Deployment, Performance Optimization, Data Engineering

PUBLICATIONS

- *Analysis of the Distractions in Youth Due to Social Media and Their Effects on Concentration* – Springer (SOCTA)
- *Prediction and Classification of Contamination of Pollutants in Air Using Machine Learning Algorithms* – IEEE (CIISCA)
- *Application of Deep Learning Techniques for Multi-Class Skin Disease Classification* – Springer (HINT'24)

CERTIFICATIONS

Fundamentals of Visualization with Tableau – Coursera — Introduction to Cybersecurity Foundations – Coursera — NLP Foundation Certificate – Infosys Springboard
